

9. LIMITATION AND FUTURE ENHANCEMENT

9.1 LIMITATIONS

- Limited to the particular organization for which it is built.
- Clients need to go the WAF admin manually to be provided with service of WAF.

9.2 FUTURE ENHANCEMENTS

- It can be improved to contain more features but that's dependent on the future needs of the organization.
- Multiple WAF box will be maintained by WAF portal.
- To reduce the header flooding problem there must be a network configuration like in web server and end users there load balancer (high configured Apache) then WAF box will be proxy server through will communicate the web server.
- Clients can be notified of an update with a SMS.
